PRODUCT ROADMAP · MVP 2

MVP 2 — Feature List

Scale & Enterprise · 40 features across 9 architecture layers

IQE-035 … IQE-074. Each feature shows its description and current build status (derived from the live codebase, mid-Oct 2026).

Owner Omeesha **Approver** Deepak Chandwani

OVERVIEW

40 MVP2 features · status at a glance

IQE-035–074

FEATURES BY LAYER

Layer 1 · Inputs 1	Layer 2 · Agents 1	Layer 3 · Execution 4
Layer 4 · App Support 7	Layer 5 · Integrations 7	Layer 6 · Security 8
Layer 7 · AI/LLM 4	Layer 8 · Analytics 5	Layer 9 · Deployment 3

Status key: DONE = shipped · PARTIAL = exists, needs finishing/hardening · NOT STARTED = net-new build. 29 of 40 still need work.

FEATURE LIST

Layer 1–3 · Inputs · Agents · Execution

6 features

IQE-035	**CI/CD Event Triggers** — Commit / PR events trigger generation & run; results returned to pipeline.	PARTIAL
IQE-036	**Audit Agent** — Structured audit trail of every agent action — powers the compliance log.	PARTIAL
IQE-037	**Parallel Execution** — Multiple suites at once; configurable worker count; measurable speed-up.	DONE
IQE-038	**Load & Performance Profiling** — Load / concurrency testing layered onto existing flows.	DONE
IQE-039	**Pipeline Templates** — Smoke / Regression / Full-suite templates + scheduled & env-var runs.	PARTIAL
IQE-040	**Steerable Execution** — Pause / skip / retry individual steps mid-run without stopping the suite.	NOT STARTED

FEATURE LIST

Layer 4 · App Support

7 features

IQE-041	**Shadow DOM / Web Components** — Salesforce Lightning, MS Fluent, custom component libraries.	NOT STARTED
IQE-042	**iFrame-embedded Content** — Cross-origin iFrames, embedded payment processors, legacy shells.	NOT STARTED
IQE-043	**Hybrid DOM + Canvas (DOM layer)** — Test the DOM shell of canvas apps; canvas pixels scoped to MVP3.	NOT STARTED
IQE-044	**REST API — Full Suite (OpenAPI)** — Generation from spec; OAuth2 / JWT / API-key auth; service-layer assertions.	DONE
IQE-045	**GraphQL Testing** — Generation from SDL / introspection; query & mutation validation.	PARTIAL
IQE-046	**Contract & Schema Validation** — Schema-drift detection, consumer-driven contracts, breaking-change flags.	DONE
IQE-047	**Mock Server (WireMock/Prism)** — Stub upstream dependencies for isolated API testing.	DONE

FEATURE LIST

Layer 5 · Integrations

7 features

IQE-048	**TestRail Direct API Sync** — Bidirectional real-time case & result sync; replaces CSV export.	DONE
IQE-049	**GitLab CI Integration** — GitLab CI pipeline triggers and receives IntelliQE results.	DONE
IQE-050	**Azure DevOps Pipelines** — ADO pipeline triggers IntelliQE; results returned to the pipeline.	PARTIAL
IQE-051	**GitLab Code Push** — Generated test scripts pushed to the GitLab repo.	DONE
IQE-052	**ADO Repos Code Push** — Push code & artifacts to Azure DevOps repos.	NOT STARTED
IQE-053	**Slack Notifications** — Test results & critical failures posted to a Slack channel.	DONE
IQE-054	**Microsoft Teams Notifications** — Execution results posted to a Teams channel.	DONE

FEATURE LIST

Layer 6 · Security

8 features

IQE-055	**SSO / RBAC** — Enterprise SSO + role-based access control per user & team.	PARTIAL
IQE-056	**MFA & Session Management** — Multi-factor auth; configurable session timeout.	PARTIAL
IQE-057	**Secret Vault Integration** — Azure Key Vault / HashiCorp — creds resolved at runtime, none stored.	PARTIAL
IQE-058	**Compliance Audit Log Viewer** — Queryable agent-action log; exportable for compliance review.	PARTIAL
IQE-059	**Data Retention & Auto-Purge** — Per-tenant retention policy; auto-purge on expiry (90-day default).	PARTIAL
IQE-060	**IP Allowlist / Blocklist** — Network-level access control — only approved IPs reach the instance.	NOT STARTED
IQE-061	**Per-Tenant AI Budget Enforcement** — Token consumption tracked & capped per tenant; throttle on breach.	PARTIAL
IQE-062	**Row-Level Database Security** — DB-enforced tenancy — no cross-tenant access at the database layer.	NOT STARTED

FEATURE LIST

Layer 7–8 · AI/LLM · Analytics

9 features

IQE-063	**Reasoning Effort Controls** — Per-stage LLM effort (high / medium / low).	PARTIAL
IQE-064	**Cost Attribution & Token Monitoring** — Token usage attributed per run / agent / customer; exportable.	PARTIAL
IQE-065	**Agent Performance Scoring** — Accuracy, heal-success, false-positive, cost efficiency per agent.	PARTIAL
IQE-066	**Self-Healing Performance Metrics** — Heal success rate & accuracy — data behind the 60% maintenance claim.	PARTIAL
IQE-067	**Coverage Trend Dashboards** — Coverage trend per sprint / release; TestRail traceability.	PARTIAL
IQE-068	**Flakiness Intelligence & Auto-Quarantine** — Detect & auto-quarantine flaky tests; flakiness tracked over time.	PARTIAL
IQE-069	**AI Agent Analytics** — Tokens, accuracy & cost efficiency per agent per run.	PARTIAL
IQE-070	**Scheduled Report Delivery** — Daily / weekly / triggered email report delivery.	PARTIAL
IQE-071	**Unified Web + API Reporting** — Single dashboard across all test types & environments.	DONE

FEATURE LIST

Layer 9 · Deployment

3 features

IQE-072	**GCP Deployment** — Google Cloud / GKE container deployment (NRG, CenterPoint stacks).	NOT STARTED
IQE-073	**VNet Complexity — Custom Config** — Non-standard segmentation / compliance; scoped & priced post-assessment.	NOT STARTED
IQE-074	**Automated Tenant Onboarding** — Self-service provisioning for new workspaces; guided setup wizard.	PARTIAL
